

AD HEALTH & SAFETY

Event Safety Solutions

A1GP

WORLD CUP PITSTOP

To further promote the continuing success and popularity of A1GP, AD Health & Safety was approached to plan and manage the event safety of the A1GP World Cup Pitstop on Regent Street, London.

Historically on-street motor sport events in London have been hugely successful, drawing many thousands of people and in the process raising concern amongst the responsible authorities. AD Health & Safety is well known in the business for successfully managing vehicle related events including two Gumball Rally Start Events, Mojave Desert F1 Speed record, as well as Morgan and Ferrari Events.

Working with the production team, AD Health & Safety designed pragmatic measures into the site layout to manage and control large groups of enthusiasts, allowing them close access to the cars and other attractions at the event. During the planning stages and during the event day itself, working closely with the responsible authorities ensured a safe and smoothly run day.
