

# AD HEALTH & SAFETY

## Event Safety Solutions

### **BRYN FEST AUGUST 2008**

The Bryn Fest is an annual event held at Vaynol Hall, Gwynedd, North Wales. Following enormous proposed increases to the cost of policing the event, AD Health & Safety were asked to holistically review the security planning of this event.

Historically, there had been issues with groups of youths attending and causing disturbances inside and outside the event area. Following intense negotiation with the police and the development and implementation of strategic and tactical plans, the issues were significantly reduced two years running and the proposed increase in police charges were abated.

AD Health & Safety provided the security and stewarding for the 2008 event as well as managed the on-site safety and traffic management, improving the joined up approach of the operational phases of the event.

### **Testimonial**

“As a freelance producer you rely on the team around you to be at the top of their game and be able to react to a wide range of issues within their field of expertise. Health and Safety is a minefield that really needs a clear, calm and logical approach and that is where AD come in to their own. Not only have they helped me out of some very specific problems on events but they are also prepared to roll their sleeves up and get stuck in which is what working as part of a team is all about.
